## 1. Executive Summary

This report presents the highlights on the performance of the Bhutanese financial sector for the period ended Q3FY22 in comparison to the previous year's corresponding quarter and includes five banks, two insurance companies, one National Pension and Provident Fund, five Microfinance Institutions, and one CSI Bank. The main highlights of the Bhutanese financial Sector are as follows:

The capital fund stood at Nu. 27.66 billion in March 2022 as compared to Nu .22 .95 billion in March 2021. The CAR stood at $15.55 \%$ in March 2022 as compared to $13.31 \%$ in March 2021. Non-performing loans (NPLs) in the financial sector has decreased from Nu. 24.75 billion in March 2021 to Nu. 17.56 billion in March 2022. The Production \& Manufacturing, Trade \& Commerce, and Service \& Tourism sectors saw a huge decrease in NPL by Nu. 2 billion, 1.42 billion and 1.44 billion respectively. The formulation and application of robust Monetary Measures (Phases I, II, and III) have enabled the availability of relief measures in the form of Interest Payment Support, Loan Restructuring and Rescheduling, and Deferment, which have helped in the improvement of the quality of loan portfolio. However, the impact of pandemic on the financial sector's Asset Quality (NPL) is expected to be a key challenge going forward.

The profitability of financial institutions has increased in March 2022 as compared to last year's same quarter. The profitability (after tax) as of March 2022 stood at Nu. 3.37 billion as compared to a profit of Nu. 1.63 billion in March 2021. The profit was mainly brought about by the decrease in NPL that subsequently resulted in write-back of loan provision by Nu. 800 million.

The Liquidity Position of the financial sector is expected to remain relatively stable with the implementation of the Domestic Liquidity Management Framework to help the financial institution with liquidity support. The domestic financial system has already played a significant role in supporting the liquidity needs of businesses so far in this pandemic. The deposit's structure has remained stable and largely unaffected since June 2021. The Cash Reserve Ratio (CRR) was reduced from 10 percent to 9 percent on 17th March 2020 and further to 7 percent on $27^{\text {th }}$ April 2020, releasing total liquidity of over Nu. 4 billion to enable lending. Financial institutions' Statutory Liquidity Ratio (SLR) as of March 2022 is also above the minimum regulatory requirement of 20 percent for banks and 10 percent for non-banks.

## 2. Highlights of the Financial Institutions ${ }^{1}$

| Highlights of the Financial Institutions |  |  |  |  |  |
