## Highlights on the Financial Sector Performance

## September 2021

This report presents the highlights on the performance of the Bhutanese financial sector on peer group basis for the period ended Q3FY'21 in comparison to the previous year's corresponding quarter. This report has been prepared by the Department of Financial Regulation \& Supervision of the Royal Monetary Authority of Bhutan (RMA) and the information contained in this report is based on the returns submitted by the financial institutions.

## DEPARTMENT OF FINANCIAL REGULATION \& SUPERVISION ROYAL MONETARY AUTHORITY OF BHUTAN

This report presents the highlights on the performance of the Bhutanese financial sector for the period ended Q3FY'21 in comparison to the previous year's corresponding quarter and includes five banks, two insurance companies and National Pension and Provident Fund. The main highlights of the Bhutanese financial Sector are as follows:

The capital fund stood at Nu. 23.7 billion in September 2021 as compared to Nu. 20.5 billion in September 2020. The CAR stood at 13.6 percent in September 2021 as compared to 12.4 percent in September 2020. However, the risk of dispersion/distribution of Capital Levels among the financial institutions remains high and some institutions that have entered the pandemic with relatively low capital and riskier exposures may face challenge. The release of the Capital Conservation Buffer (CCB) built prior to the pandemic have allowed financial institutions to cover for increase in non-performing loans (NPLs) and maintain their financing activities to the economy. The CCB release makes available Nu. 2.6 billion of capital across the financial sector, with the potential to support additional lending between Nu. 20 billion to Nu. 25 billion. However, given the overall uncertainty of the scale and duration of the crisis, it is important that the financial sector remains well-capitalized. Financial institutions should ensure that the assessment of their capital positions is forward-looking and that it takes into account current uncertainties.

Non-performing loans (NPLs) in the financial sector has decreased from Nu. 25.5 billion in September 2020 to Nu. 21.8 billion in September 2021. Extensive monetary measures including the temporary deferment facility in place has helped in mitigating the immediate liquidity shock to the affected sectors/businesses and prevent financial institutions from further build-up of NPLs. However, the impact of pandemic on financial sector's Asset Quality (non-performing loans) is expected to be a key challenge going forward. If the pandemic's economic effects prove to be acute and persistent in medium to long term, financial institutions would be under stress and a significant portion of destressed loans may ultimately require repayment extension and restructuring.

As of June 2021, most of the financial institutions have made profit mainly on account of decrease in NPLs. The profitability (before tax) as of September 2021 stood at Nu. 2.6 billion as compared to a loss of Nu. 1 billion in September 2020.

The Liquidity Position of the financial sector is expected to remain relatively stable with the implementation of Domestic Liquidity Management Framework to help financial institution with liquidity support. The domestic financial system has already played a significant role in supporting liquidity needs of businesses so far in this pandemic. Deposit's structure has remained stable and largely unaffected since December 2019. The Cash Reserve Ratio (CRR) was reduced from 10 percent to 9 percent on 17th March 2020 and further to 7 percent on $27^{\text {th }}$ April 2020, releasing total liquidity of over Nu. 4 billion to enable lending. Financial institution's Statutory Liquidity Ratio (SLR) as of September 2021 are also above the minimum regulatory requirement of 20 percent for banks and 10 percent for non-banks.

## 1. Highlights of the Financial Institutions ${ }^{1}$

| Highlights of the Financial Institutions |  |  |  |  |  |
