ALWAYS CHECK MORE THAN ONE FEATURE USING THE LOOK - FEEL - TILT METHODS

1. Watermark

Watermark can be seen in all the denominations except in Nu.1 and Nu.5. Portrait of 5th King can be seen in denomination of Nu.50 and Nu.1000 and rest with the portrait 4th King.

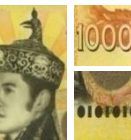

2. Security Thread

The Security thread is different for each denomination. In the denominations of Nu.100, Nu.500 and Nu.1000, you can see the inscription “RMA and numerical value” of the banknote in repeated sequence.

3. Micro Lettering

The words “ROYAL MONETARY AUTHORITY OF BHUTAN” is printed extremely small which can be read only with a magnifying glass. You can see at the right and left side and at the top center of the banknote in all denominations.

4. Intaglio (raised print)

Raised prints can be felt by touch which is extremely difficult to replicate (e.g. Royal Monetary Authority of Bhutan in Dzongkha, blind recognition, motif, denomination figures, signature micro letterings etc.).

5. PEAK (Printed and Embossed Anti-Copy Key) Feature

The denomination of each banknote is printed in its center as a PEAK feature. Under different viewing angles the PEAK feature shows the denomination of the respective banknotes.

6. Optically Variable Ink (OVI)

The ink displays two distinct colours depending on the angle of banknote (Nu.1000-Reverse) is viewed at.

7. Iridescent Stripe

Shimmery stripe can be seen on the denominations of Nu.50, Nu.100 and Nu.500 at the reverse side.
